

Cole Biehle • *Interaction Designer*

tbiehle@cs.cmu.edu | colebiehle.com | github.com/colebiehle | linkedin.com/in/colebiehle | (602) 540-6515

EXPERIENCE

Founding Product Designer | Analogical Engines

Aug 2025 - Present | **Pittsburgh, PA**

- Designed and built a go-to-market tool end to end (Next.js, Python, Claude API), enabling streamlined customer discovery, including 40+ interviews with R&D leaders at Google, PepsiCo, and McKinsey.
- Built working AI prototypes during stakeholder sessions to pressure-test workflows, then partnered with engineers to turn validated interactions into interface patterns and product decisions.
- Led the research, positioning, and visual pitch that won first place and \$150k at CMU's McGinnis Venture Competition.

UX Research Consultant | Mindswarms

Sep 2022 - Feb 2025 | **San Francisco, CA**

Clients: Google, Amazon, Microsoft, Nike, American Express

- For Google Ads, mapped how advertisers build campaigns across the purchasing funnel to inform how the platform's buying workflows and interaction models should evolve.
- Researched privacy and safety on YouTube and other UGC-heavy products, including protections for minors, to inform product decisions around sensitive user data.
- Ran studies in parallel across clients, constantly reprioritizing competing requests, and built the decks and data stories that turned complex findings into product direction, including the research behind the "What people are saying" Search pill.

Product Designer | Zelig

Jun 2023 - Dec 2023 | **Beverly Hills, CA**

- Owned UX research end to end for a GenAI fashion tool (50+ interviews, 200+ surveys), then pitched the positioning to investors to help secure a \$15M Series A.
- Worked across design, research, and engineering, presenting insights and design prototypes to the C-suite and outside partners, turning research into product direction the team built.

PROJECTS

Team Lead & Product Designer | Carnegie Mellon, Honda 99P Labs (Capstone)

Jan 2026 - Present | **Pittsburgh, PA**

- Led and structured a cross-functional capstone for Honda 99P Labs, coordinating stakeholders, design decisions, and research to design how drivers safely signal intent on the road.
- Designed and prototyped multimodal interfaces (audio, visual, haptic) in React/TypeScript with AI, mapping driver journeys while balancing safety, cognitive load, and personal preferences.

Research Assistant | UC San Diego, Protolab & HXI (Dr. Steven Dow & Dr. Nadir Weibel)

Sep 2022 - Present | **La Jolla, CA**

- Designed agent hand-off interactions for a multi-agent LLM writing tool (in submission to UIST 2026): how writers and AI agents pass work back and forth, shipped as a working React interface.
- Ran a 172-participant study on how an LLM's cues shape thinking (Collective Intelligence 2025); first-authored a paper on combatting miscommunication and validating data integrity in news platforms (Computation + Journalism 2024).

UI Designer & AI Researcher | Carnegie Mellon, UI for AI (Independent Study)

Aug 2025 - May 2026 | **Pittsburgh, PA**

- Designed AI-native interface concepts for steering foundational models beyond the chat box, from blank-canvas start to keeping users in control as context grows; published at uiforai.design and presented to industry design leaders.

EDUCATION

Carnegie Mellon University, School of Computer Science

Pittsburgh, PA

Master of Human-Computer Interaction

Expected Aug 2026

- Teaching Assistant (AI Augmented Designer): taught 60+ graduate designers on using AI tools across the design process.
- Relevant Courses: Advanced Interaction Design, AI Augmented Designer, Human-AI Interaction, Prototyping Algorithmic Experiences, Programming Interactive Experiences

University of California, San Diego

La Jolla, CA

Bachelor of Science in Cognitive Science (Design Specialization), Minor in Computer Science

Jun 2022

SKILLS

Design: Interaction Design, User Journeys, Wireframing, Interaction Models, Prototyping, Information Architecture, Design Systems, Visual Design, Data Visualization, Accessibility

AI & Engineering: AI prototyping (Cursor, Claude Code), Prompt engineering, Agentic / multi-agent workflows, LLM & diffusion APIs, React/Next.js, TypeScript, Python

Research: Generative & Evaluative Research, Usability Testing, Survey Design, A/B Testing, Mixed-Methods, Thematic Analysis

Tools: Figma, Adobe Creative Suite, Final Cut Pro
